Here are current 303(d) lists for Region 9 states.

One thing to note is that 303(d) lists include those impaired waters that require a TMDL. However, the lists you were sent for mapping seem to include impaired waters that require a TMDL and impaired waters that don't (such as those which are "Category 4", where a TMDL or alternative was completed as opposed to Category 5, which is an impaired water which a TMDL is required and has not yet been completed.

But this piece will at least give you the Category 5 portion, however, California's table includes Category 4 as well.
